A System Of Products That Work As One

In the demanding world of law enforcement there is little room for error. Performance is paramount. Failure is not an option. Among the men and women of this specialized profession, the name ASP is synonymous with quality. These are individuals who place their personal safety at risk each and every day in the protection of others. That these dedicated men and women prefer ASP products above all others is something of which we are extremely proud.

For over four decades, the distinctive ASP insignia has stood for innovative design, flawless function and an unparalleled standard of service.

Today ASP manufactures five distinct categories of products. Each is unique . . . the result of cutting edge design, advanced manufacturing technologies and exhaustive field evaluations. This is a product line so advanced that it is protected by over 150 patents.

From the beginning, the ASP Eagle has reflected an uncompromising standard of craftsmanship. Throughout the world, ASP remains the first choice of quiet professionals. In this catalog, you will find products of distinction built to a singular standard of quality. For those who cannot afford less. ASP . . . protecting those who protect.

Kevin Parsons, PhD
Chairman & CEO

SELECTING YOUR ASP BATON

Seventy five models of ASP Batons assure the perfect match between product and mission. From Locking System to Length, you will find an ASP design that fits your specific requirement. Each series is available with Grips, Shafts and Attachments that will make your job safer.

FRICTION

Tested by the most elite federal teams, the Friction Baton has proven itself “virtually indestructible.” This is the first choice of the world’s most tactically advanced law enforcement agencies.

TALON INFINITY

The Talon Infinity Baton is the most advanced impact weapon ever developed. Its precise internal caliper system allows rapid deployment with solid, decisive lockout. The push-button release provides smooth retraction by hand or directly into an ASP scabbard.

SENTRY

Designed for the security professional, the Sentry Series offers a moderately priced alternative to ASP Friction (4140) expandables.

CONCEALABLES

The reduced diameter and low profile grip of Concealable Batons allow them to be carried inside the waistband or worn on a dress belt.

BATON MODELS

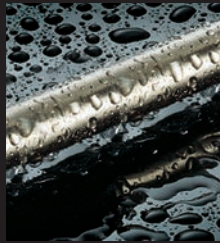

ASP product codes are systematic and easily distinguished. The first letter (F or T) is the Locking System. The next two digits (16, 21, 26 or 40, 50, 60) are the Length. The next letter (A, B, E) is the Shaft. The final letter (D, F, W, V) is the Grip.

Airweight offers a 45% weight reduction with 98% of the striking potential of steel.

Black Chrome provides the most durable and corrosion resistant black baton finish available.

Electroless is the most corrosion resistant finish. It is well suited to high humidity environments.

SELECTING YOUR ASP RESTRAINT

It has been called the greatest handcuff advance of this century. The ASP Restraint System. A fusion of innovative design, advanced materials and cutting edge technology. The result of an exhausting eight year design effort. A system with real world features. A restraint series that has set a new standard for safety and security.

CHAIN

Each restraint is unitized with replaceable Lock Sets and high contact bows. Cuffs have a double sided keyway and color coded double lock indicator.

HINGE

Hinge Handcuffs provide increased control of violent subjects. Because of their conical bow geometry, the cuffs fit large subjects yet still control small wrists.

RIGID

The Rigid configuration offers the most restrictive handcuff structure in the ASP Restraint Series. It removes both lateral and linear mobility. For this reason, Rigid cuffs are ideal for courtroom or airline restraint.

TRI-FOLD

Tri-Fold Disposable Restraints are the most compact, easily carried and rapidly applied single use restraint on the market.

TRANSPORT SYSTEM

Rigid handcuffs form the foundation of the ASP Transport System. Restraint components are contained in rapid access carriers.

CASES

ASP Handcuff Cases are a benchmark blend of the finest materials in a series of clean, functional designs. Each case incorporates an integral back pocket and auxiliary handcuff key. Most carriers are available in Black, Basketweave, Ballistic and ASPtec.

SELECTING YOUR ASP LIGHT

ASP was an early pioneer in handheld LED lighting and maintains deep ties in the lighting industry. ASP lights are blindingly bright. They combine innovative design with world class craftsmanship. The result is unparalleled performance and uncompromising reliability in law enforcement lighting.

DOT

The Dot was designed as the world's smallest full function micro USB rechargeable flashlight.

GARDA

Garda lights were designed as the ultimate backup. They are small, smooth and powerful.

SCRIBE

Scribe pen style lights are part of the ASP series of Every Day Carry (EDC) illumination tools. They are small, bright and tough. They provide a shirt pocket backup to ASP Duty lights.

TUNGSTEN DF

The Tungsten DF employs Dual Fuel Technology. It may be powered by two CR123A batteries which will produce 430 lumens for 3 hour and 30 minutes.

TRIAD DF

Triad DF lights add a micro USB charge port, internal charge circuit and Lithium-ion power cell to the signature ASP Duty light.

RAPTOR DF

All contacts and springs of the Raptor are gold plated for increased conductivity. The electronic circuitry drives a Cree XP-L LED to over 1,900 lumens.

ASP is a founding member of the Portable Lights American Trade Organization (PLATO) and a charter member of the ANSI FL1 Flashlight Standards Committee.

All ASP lights are tested to PLATO/ANSI FL1 Standards.

LIGHTING ACCESSORIES

TLC (TACTICAL LIGHT CASE)

The TLC is available for all categories of ASP illumination tools. The TLC rotates 360° to 12 distinct positions. Cases carry lights lens down.

BATTERIES

The increased energy density of Lithium power cells results in longer run times. ASP designs are available in primary (blue) or rechargeable (green) configurations. Rechargeable cells incorporate an integral micro USB (red band) charge port.

CHARGE BANK

The Charge Bank provides convenient in car or USB charging of ASP 18650 batteries. They provide protective storage and are easily transported. Charge Banks can recharge any USB product.

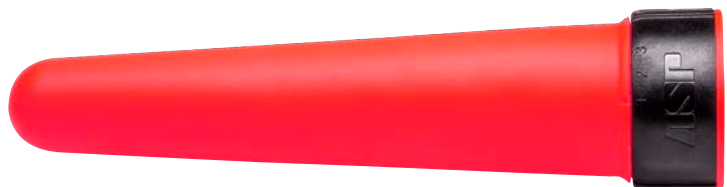

RETRACTABLE PLUS

A USB to micro USB retractable connecting cord with reversible plugs. A braided cord cover provides increased protection while charging.

TRAFFIC WAND

An enclosed soft polymer vehicle director attaches to ASP Duty and Strategic lights.

PROTECTING THOSE WHO PROTECT

It is a corporate goal. A statement of mission. An approach to doing business. The company supplies impact weapons, restraints and lights to major police agencies in over 100 countries. The ASP Tactical Baton is the dominant intermediate force impact weapon in the law enforcement community.

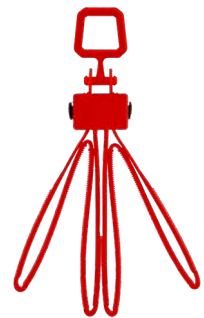

BAGS & BATONS

ASP Training Bags and Batons allow officers to master impact, light and restraint techniques while preparing for the reality of the street.

RESTRAINTS

Handcuff Training requires repetition to master basic skills. The Lock Set of these handcuffs allows the student to rapidly remove the cuffs by simply rolling their wrists.

RED GUNS

Red Guns provide rugged, lightweight steel reinforced training replicas that are precisely detailed to create a safe training environment. Enhanced Red Guns have drop free magazines.

Protecting Those Who Protect
