

MOUNTS FOR 40mm

INTERCHANGABLE RANGING UNITS FOR DIFFERENT AMMUNITION

EXPORT RESTRICTIONS - "SWEDISH ITAR"

In accordance with Swedish Law (1992:1300) about Military Equipment and Ordinance (1992:1303) about Military Equipment export of the GLSM requires an Export Permit issued by the Inspectorate of Strategic Products (ISP).

- MAXIMIZE FIRST-ROUND HIT PROBABILITY
- BUILT-IN BALLISTIC CORRECTIONS
- BUILT-IN SPIN DRIFT CORRECTIONS

- REDUCED RISK FOR USER ERRORS
- REDUCED NEED FOR TRAINING
- VERSATILE AND RUGGED

SPUHR® NEW GENERATION

MODULAR GRENADE LAUNCHER SIGHT MOUNT

– PRECISION THROUGH MODULARITY (PATENT PENDING)

The Spuhr® Modular Grenade Launcher Sight Mount represents a new standard in mission-adaptable fire-control accessories for 40mm grenade launchers. Developed to maximize first-round hit probability regardless of munition, the system introduces a groundbreaking interchangeable Ranging Unit that delivers unmatched flexibility in the field.

INTERCHANGEABLE RANGING UNITS TAILORED FOR EVERY AMMUNITION TYPE

At the core of the design is a robust, easy-to-swap Ranging Unit fitted with pre-engineered ballistics, including trajectory and spin-drift compensation. Each Ranging Unit is individually zeroed once, allowing users to maintain precise, repeatable accuracy without re-zeroing when switching between ammunition types.

Operators can build a complete set of mission-specific Ranging Units – enabling seamless transitions between different 40mm munitions regardless of whether changing between lethal and/or less-lethal munition.

ENHANCED ACCURACY AND CONSISTENCY

The built-in ballistic corrections within each Ranging Unit significantly reduce user errors, thereby increasing the likelihood of accurate first-round impact. By integrating spin-drift and trajectory data into the Ranging Unit, the Modular Grenade Launcher Sight Mount is even more user friendly than the legacy GLSM produced by Spuhr®.

REDUCED TRAINING BURDEN

– INCREASED OPERATIONAL READINESS

As each Ranging Unit comes delivered with built-in trajectory and spindrift compensation, operators require less time and ammo expenditure to become proficient, thereby providing an instant return on investment within the first training sessions.

MISSION-FOCUSED VERSATILITY

Whether supporting peacekeeping operations, law-enforcement tasks, or military missions, the Spuhr® Modular Grenade Launcher Sight Mount provides reliable adaptability. Its rugged construction, intuitive Ranging Unit replacement, and consistent precision, make it a force multiplier for units requiring dependable, repeatable performance with multiple ammunition types.

SPECIFICATIONS

GR-1200 NEW GENERATION MODULAR MOUNT

The GR-1200 is our modular Grenade Launcher Sight Mount. Different ranging units tailor-made for specific ammunition is available. (Patent pending)

FIRST GENERATION MOUNTS

(PATENTED)

Recognizing the variety of launchers and munitions available, the ballistic bow-at the core of the GLSM-is precisely manufactured to match the exterior ballistics of the specific launcher and ammunition specified by the customer.

With design for use with HE low-velocity munitions, the GR-1000 series features a ballistic bow with range settings from 50 to 350 meters. For enhanced usability in low-light conditions, the rear of the ballistic bow includes Luminova or tritium inserts for the 100, 200 and 300-meter range settings.

SPECIFICATIONS

HK GLM MOUNT

The GR-1000 is our original Grenade Launcher Sight Mount, specifically designed to attach to the side of an HK GLM. The GR-1000 is also offered with Luminova as the GR-1010.

MOUNT FOR SIDE PICATINNY

NSN 1240-22-625-2185 (Tan color)

NSN 1005-22-624-9431 (Tan color w/ Aimpoint T1)

NSN 1240-15-206-0284 (Luminova)

The GR-1001, GR-1003, GR-1004, and Luminova versions GR-1011 and GR-1014, are designed to attach to the side of a Picatinny forend or rail.

GR-1003 GRENADE LAUNCHER SIGHT MOUNT

The GR-1003, based on the GR-1001, was developed for the Swedish Armed Forces and is designed to mount onto the side of a Picatinny rail. It features an updated ballistic

bow geometry, allowing for compatibility with larger accessories mounted on the side Picatinny interface.

GR-1004 GRENADE LAUNCHER SIGHT MOUNT

The GR-1004 Grenade Launcher Sight Mount (GLSM) is the export version of the GR-1003, and the GR-1004-M433 offers this proven design with the ballistics for the M433 HEDP grenade. Designed to be mounted onto the side of a Picatinny Rail..

GR-0101

The GR-0101 is an adapter rail for the Spuhr Grenade Launchers Sight Mount (GLSM,) allowing a GLSM designed to attach to a side rail to be used on a platform with only a top rail.

It is manufactured from 7075 T651 aluminum and is available in black or tan. The GR-0101 also features Spuhr Interfaces along the top surface, allowing various Spuhr ISMS accessories to be used.

PROUDLY PRODUCED IN SWEDEN

QUALITY

High-stakes real-life use can be rough on gear. This is why quality and durability are non-negotiable for every single product we make at Spuhr®. Professional users need to be able to rely on their equipment being there for them and that it performs every time and under any conditions.

At Spuhr® our world leading level of quality and attention to detail governs everything from the development all the way through production. 99% of our production is in-house with ISO certified production techniques and draconian quality management. This, combined with the truly innovative designs of Spuhr® products will enable users to reach their full potential in the battle field

In settings like this quality is not just nice to have – it means trusting your gear.
